Description 

Product description: This tool is used for pulling the lining of the engine block. It consists of a main frame and several numbered components. The main frame is made of black metal and has a central vertical rod. The numbered components are green and rectangular. The optional components are also green and rectangular. The tool is used to pull the lining of the engine block, which is a common repair for diesel engines. The tool is made of high-quality materials and is designed to be durable and reliable. It is a must-have for any diesel engine repair shop.
