Description

Product Description:
The H.C.B-B1450 Subaru Camlock Tool is a specialized tool designed for use on Subaru engines. It is used to lock the LH side cam sprockets from turning when the timing belt is removed, preventing cam sprockets from spinning and eliminating potential valve damage. This tool is essential for making timing belt changes faster and easier, especially when done with one hand.

Features:
- Locks the LH side cam sprockets from turning when the timing belt is removed.
- Prevents cam sprockets from spinning when the belt is removed.
- Eliminates potential valve damage.
- Saves time and makes timing belt changes faster and easier.
- Can be used with one hand.

Specifications:
- Material: Steel
- Color: Blue and Yellow
- Weight: 1.5 lbs
- Dimensions: 10" x 4" x 2"

Usage:
1. Remove the timing belt.
2. Insert the tool into the cam sprocket area.
3. Turn the tool to lock the cam sprocket.
4. Remove the timing belt.
5. Perform the timing belt change.
6. Reinstall the timing belt.
7. Remove the tool.

Notes:
- This tool is not intended for use on other engine models.
- Always use proper technique when using this tool to avoid damage to the engine or the tool.
