Description

Product Description :

2012 TRUCK RADIATOR PRESSURE TEST KIT (9 PCS)

?Product Info?

Model/Item No. :

H.C.B-A1412

Country of Origin :

Taiwan

Brand :

H.C.B

Product Specifications /Features :

INTRODUCTION & APPLICATIONS

- * Measuring range 10-15 psi
- * Check on pressure loss through gauge
- * Possibility of testing locking caps
- * Pressure test on the cooling system

OPERATION:

- * Remove the original radiator cover when the engine is in the cool state.

Choose a test cap suitable for the radiator and screw the cap onto the expansion radiator. (Fig)

- * Connect the pump to the test cap through the quick adaptor at the hose end.

* Pressurize the kit to 10~15 psi. If the gauge pointer stops for 1 minute, it means the whole circuit is in perfect situation; if it goes down, it means the circuit leaks. But if the gauge goes down and no fluid leakage, check whether the engine head gasket is worn. (CAUTION: please avoid the pressure up to the 35 psi.)

- * Finally, release pressure by using the pressure relief valve. Clean up any fluid or dirt before pack up the kit.

Primary Competitive Advantages :

Well and High Quality Control, Prompt Delivery, New Product, Customer's Design and Logo are Welcome, Competitive Prices, Earth-friendly Products

Sales Method :

Export, Manufacture

Payment Term :

T/T, L/C at Sight
